DETAILED ACTION

1. The amendment filed 1/4/06 has been entered. Claims 4-6 have been canceled. New claims 7-9 have been added. Claims 1-3 and 7-9 are pending in the application.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mizuno (USPN 4,794,981.) Mizuno teaches a cooling system for electronic components including a substrate on which electronic components are mounted, a first layer of adhesive material 4 provide on a surface of the substrate opposite the components, a second layer 5 made of a material having a relatively low melting point provide on the first layer (*reads upon heat absorbing layer*), and heat radiating means or block 6 provided on the second layer to outwardly radiate heat transmitted from the electronic components through the substrate, first layer and second layer; wherein the second layer may be metallic, solder or wax; and the adhesive layer is a flexible layer formed from silicone rubber and filler particles having high thermal conductivity (Abstract; Figures 1-2; Col. 1, lines 43-Col. 2, lines 36.) Mizuno does not teach the thickness of the layers as instantly claimed however one having ordinary skill in the art at the time of the invention would have been motivated to determine the optimum thickness for each layer based

the selected layer material and the desired mechanical properties, adhesive properties, and heat radiating properties for a particular end use.

Page 3

5. Claims 2-3 and 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mizuno in view of JP 02-058580A or GB 2 229 041 A. The teachings of Mizuno are discussed above. Though Mizuno teaches that a heat radiating means is provided on the second layer to outwardly radiate heat transmitted from the electronic components, Mizuno does not limit the type of heat radiating means utilized or teach that the heat radiating means includes a coating film containing silicon dioxide, aluminum dioxide and/or kaolin. However, it would have been obvious to one having ordinary skill in the art to utilize any known heat radiating means wherein a silicone coating comprising metal oxide filler or similar particulate filler such as those instantly claimed is a known heat radiating means as evidenced by JP'580 or GB '041, and would have been obvious to one having ordinary skill in the art at the time of the invention.

Response to Arguments

- 6. Applicant's arguments with respect to claims 1-3 and 7-9 have been considered but are moot in view of the new ground(s) of rejection.
- 7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique R. Jackson whose telephone number is 571-272-1508. The examiner can normally be reached on Mondays-Thursdays, 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on 571-272-1284. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
